

Dylan Robles

dtrobles@umich.edu | (650) 776-4560 [dtrobles.github.io](https://github.com/dtrobles) | [linkedin.com/in/dtrobles](https://www.linkedin.com/in/dtrobles)

Education

University of Michigan | College of Literature, Science, and The Arts, Ross School of Business
B.S. in Computer Science, Minor in Business | GPA: 3.8/4.0

Ann Arbor, MI
May 2026

Skills

Programming Languages: Python, C++, TypeScript, JavaScript, Java, HTML, CSS

Technologies: Git, React Native, Vue.js, Flask, PyTorch, Node.js/Express, REST API, MongoDB, PostgreSQL, Linux, Android SDK, Pandas, AWS, Docker

Languages: English, Japanese, Chinese (Mandarin), Spanish

Relevant Experience

Machine Learning Intern

University of Tokyo, Yamashita An Laboratory

Tokyo, Japan

July - September 2024

- Refined image realism and **boosted training speed by 33%** through proposing and implementing CUT over CycleGAN, enhancing the study 'CycleGAN-based Realistic Image Dataset Generation for Forward-Looking Sonar'.
- Utilized weight sensors and developed a **data extrapolation and graphing tool** for ショッカクシューズ (Shokakku Shoes) using Python, Pandas, Dash (Plotly), and Batch scripting.

Projects

github.com/dtrobles

Tomorrow's Trends

Vue.js, PyTorch, Flask, PostgreSQL, Docker

- Developed a web application that **predicts news trends** over 24-hour, 1-week, and 1-month periods, utilizing a **PyTorch model** trained on data from Google Trends, historical news articles, and Twitter posts.
- Built and deployed with a Vue.js frontend, Flask backend, and PostgreSQL database in a Dockerized environment.

Image-to-Playlist Mobile App

React Native, Node.js/Express, AWS, REST API

- Developed Melodeye, a **native mobile app** that leverages GPT-4o's image analysis and the Spotify API to dynamically **generate user playlists** based on the **contents of an image**.
- Utilized React Native for the frontend, Node.js/Express with REST API protocols for the backend, and AWS for deployment.

NLP Piazza Post Classifier

C++, Natural Language Processing

- Utilized the **bag-of-words model** to automatically identify the subject of class Piazza posts.
- Leveraged binary search trees and maps for data management. Implemented recursive algorithms for classification to enhance the accuracy of subject identification.

Additional Experiences

YouTube, TikTok, Instagram Creator

Founder

Mountain View, CA

2021 - Present

- Established a unique brand and cultivated over **90M views and 130K followers** on multiple platforms.
- Mastered media applications including Blender, Premiere Pro, After Effects, and Photoshop.

Aspect Computers Nonprofit

Founder and CEO

San Francisco, CA

2019 - Present

- Implemented expertise in computer building to bridge the technology gap in the Bay Area, aiding underprivileged families in leveraging technology.
- Generated \$10,000+** in funds through diverse outreach campaigns.
